

MoodNoise: sound for focus, sleep and calm

White, brown and pink noise, rain, ocean, fire and more, made live in your browser. Tap sounds to mix them, set a sleep timer and share your mix as a link. Free, no sign-up, no ads.

Open it: moodnoise.com/mixer · Plans: moodnoise.com/pricing · Updated October 2026

What MoodNoise is

MoodNoise generates every sound in your browser as it plays, with the Web Audio API. There are no recordings to download and no loop to hear: rain falls drop by drop, waves arrive at their own pace, the fire crackles at random. Pages open fast and keep working offline after your first visit.

- **Free:** all 22 sounds; the mixer and every preset; sleep timer up to 1 hour, with fade-out; share links for any mix; works offline, add to home screen; no sign-up, ads or trackers.
- **MoodNoise Pro** adds timers of any length with fade schedules, a wake-up alarm that fades your mix in, saved mixes, playback that keeps going with your phone locked, and downloads as WAV files: MoodNoise Pass \$5 for 30 days, or MoodNoise Pro \$29 per year. Plans never renew automatically. There is no free trial.
- **Private:** nothing is uploaded or tracked. Your mixes stay in your browser. No ads, analytics or trackers.

Make a mix in four steps

- 1 Open moodnoise.com/mixer or any sound page and press the green play button.
- 2 Tap sounds to add them; tap again to remove. Each sound has its own slider.
- 3 Start with one steady sound (brown noise, rain, a fan), add one or two quieter details, then set the volume low.
- 4 Set the sleep timer, or press Share mix to copy a link that opens your exact mix. Space plays and pauses.

Every sound

Every sound is free. Linked names have their own page with the player set up for that sound.

Safe listening

Background sound only needs to soften the room: you should still hear someone speaking normally. Keep it low for long listening, especially with headphones. For sleep, put the phone or speaker on the nightstand, not by your head. For babies, keep the speaker across the room at a low volume and use a timer. MoodNoise is for comfort, focus and relaxation, not medical treatment: for sleep problems, tinnitus or attention concerns, talk to a professional.

Every page on the site

Each title below links to the full page on moodnoise.com.

Noise generators

White Noise Generator

Free white noise generator that plays in your browser. Mix it with rain, fan or brown noise, set a sleep timer and share your mix. No sign-up, no ads.

Brown Noise Generator

Deep, soft brown noise that plays free in your browser for as long as you like. Mix it with rain or a fan, set a sleep timer, share your mix. No sign-up.

Pink Noise Generator

Free pink noise generator in your browser: softer than white noise, like steady rain. Mix it with other sounds, set a sleep timer, share your mix. No sign-up.

Green Noise Generator

Free green noise in your browser: the calm middle of the spectrum, like a waterfall or wind in the trees. Mix it with nature sounds, set a timer. No sign-up.

Nature, places and machines

Rain Sounds

Free rain sounds that play endlessly in your browser. Add thunder, wind or brown noise, set a sleep timer and share your mix. No sign-up, no ads.

Thunderstorm Sounds

Free thunderstorm sounds in your browser: heavy rain, rolling thunder and wind you can mix yourself. Sleep timer and share links, no sign-up.

Ocean Waves Sounds

Free ocean wave sounds that play in your browser: waves rolling in and washing out, endlessly. Add wind or rain, set a sleep timer. No sign-up.

Forest Sounds

Free forest sounds in your browser: birdsong, rustling leaves, a stream and a breeze you can mix yourself. Calm background for work, study and rest.

Fireplace Sounds

Free crackling fireplace sounds in your browser. Add rain on the windows or wind outside, set a sleep timer and share your cozy mix. No sign-up.

Fan Noise for Sleeping

Free fan noise for sleeping, in your browser: a steady box fan sound with a soft hum. Mix in brown noise or an air conditioner, set a timer. No sign-up.

Coffee Shop Sounds

Free coffee shop sounds for work and study: quiet chatter, cups and the espresso machine, endlessly in your browser. Add rain outside. No sign-up.

Library Sounds for Studying

Free library ambience for studying: the hush of a big quiet room, a page turning, footsteps far away. Plays endlessly in your browser. No sign-up.

Airplane Cabin Noise

Free airplane cabin noise: the low, even roar of a long-haul flight, endlessly in your browser. Many people sleep best to it. Sleep timer, no sign-up.

Sleep, focus and calm

Focus Sounds

Free focus sounds in your browser: brown noise, rain, café and library mixes that hide distractions so you can concentrate. Timer and share links, no sign-up.

Study Sounds and Background Noise

Free study sounds and background noise for studying: brown noise, rain, library and café mixes with a study timer. Plays in your browser, no sign-up.

Sleep Sounds

Free sleep sounds in your browser: brown noise, rain, fan and ocean mixes with a sleep timer that fades out. No sign-up, no ads, works offline.

Relaxing Sounds

Free relaxing sounds in your browser: rain, ocean waves, forest, fireplace and soft noise you can mix. Unwind after work, read or rest. No sign-up.

Meditation Sounds

Free meditation background sounds: ocean waves, rain, a stream or soft noise, with a timer that fades out gently to end your session. No sign-up.

Brown Noise for Sleep

Brown noise for sleeping, free in your browser: deep, soft and gap-free, with a sleep timer that fades out. Settings that work and how to stay safe.

Brown Noise for Studying

Brown noise for studying, free in your browser: deep, steady noise that blocks out distractions, with study timers and mixes for deep work. No sign-up.

White Noise for Sleep

White noise for sleeping, free in your browser: steady, gap-free white noise with a sleep timer. Softer options, safe volume and tips for babies.

White Noise for Studying

White noise for studying, free in your browser: block out voices and noise while you work, with a study timer. Softer options and what research says.

Rain Sounds for Sleep

Rain sounds for sleeping, free in your browser: soft, endless rain with a sleep timer that fades out. Add distant thunder or brown noise. No sign-up.

Learn

What Is White Noise?

What white noise is, why it's called white, how it masks sounds, and what research says about white noise for sleep, focus and babies. With a free player.

What Is Pink Noise?

What pink noise is, how it differs from white noise, where it shows up in nature, and what sleep and memory studies actually found. With a free player.

What Is Brown Noise?

What brown noise is, why it's named after Robert Brown, how it differs from white and pink noise, and why so many people use it for focus and sleep.

White Noise vs Brown Noise

White noise vs brown noise compared: how they sound, which masks what, and which suits sleep, focus and babies. Switch between them in the free player.

White Noise vs Pink Noise

White noise vs pink noise: how they differ, why pink sounds softer, and which is better for sleep, focus and tinnitus. Hear both in the free player.

Presets

Deep Focus

Deep focus, a free mix of brown noise with a touch of pink, made for long sessions of concentrated work. Plays endlessly in your browser.

Rainy Night

Rainy night, a free sleep mix: steady rain, distant thunder and a bed of brown noise. Plays endlessly in your browser with a sleep timer.

Forest Morning

Forest morning, a free nature mix: birdsong near and far, rustling leaves, a stream and a light breeze. Plays endlessly in your browser.

Cozy Cabin

Cozy cabin, a free ambient mix: a crackling fire, rain on the windows and wind outside. Plays endlessly in your browser, with a sleep timer.
